## Highlights

### **European Forest Resources and the Bio-economy (27 November – 2 December 2016)**

This postgraduate course addresses the role of European forests in the bio-economy and the changes that are taking place in management and forest industry such as: European forest resources, management and governance challenges, new demands in bioenergy & bio-economy, changes in demand from industry, criteria for Sustainable Forest Management and for solid biomass production, and trade-off issues with biodiversity. To address the elements above, we bring together experts on European forest ecology, but also experts from industry, economics, and policy. At the same time, we will make excursions to field sites as well as organisations dealing with forest products.
