

Migratory birds in a rapidly warming Arctic

Thursday 17 May 2018 – NIOO-KNAW Wageningen

- 09:45** *Coffee & welcome*
- 10:10** **Bart Nolet** (NIOO-KNAW) - Opening
- 10:15** **Peter Kuipers Munneke** (Utrecht University)
The surprising climate of the Arctic
- 10:45** **Joël Bêty** (Université de Quebec)
Species interactions in the warming Canadian Arctic: new challenges for migrants
- 11:15** *Coffee break*
- 11:30** **Maarten Loonen** (Groningen University)
How geese shape Arctic ecosystems
- 12:00** **Morten Frederiksen** (Aarhus University)
A different world – why climate change may not be a major threat for migrating seabirds
- 12:30** *Lunch*
- 13:30** **Jeroen Reneerkens** (NIOZ)
Phenological mismatch in High Arctic Sanderlings: A critical look at the evidence
- 14:00** **Eldar Rakhimberdiev** (NIOZ)
Climate change tightens connection between Arctic breeding grounds and temperate refueling sites in a migratory bird
- 14:30** *Tea break*
- 15:00** **Rascha Nuijten** (NIOO-KNAW)
Migratory swans adapting to climate change: short-stopping or short-staying?
- 15:30** **Thomas Lameris** (NIOO-KNAW)
Optimal timing of migratory geese breeding in a warming Arctic
- 16:00** *Drinks*
